

NASA Ames Research Center NNA09274979R
Aeronautics and Exploration Mission Modeling and Simulation (AEMMS)
Questions and Answers No. 1

Q1: Are the required services directly related to aerospace vehicles and not airplanes?

A1: Aerospace in general, airplanes may be included.

Q2: Is this only for small businesses?

A2: The entire AEMMS requirement has been set-aside for small business.

Q3: When is the due date for advising of intent to bid?

A3: There is no due date for advising of intent to bid at this time.

Q4: Can you please clarify the statement "Most of the work will be performed on-site at Ames Research Center (ARC), Moffett Field, California."

A4: All work is currently performed on-site at ARC. However, there may be a need to perform some work off-site as a result of teaming or collaboration.

Q5: Does the awarded contractor need to meet all of the requirements associated with each research and development task activity, or can a team of contractors be awarded this to cover all potential activity requirements?

A5: The Government anticipates award of a single award Indefinite-Delivery Indefinite-Quantity (IDIQ) contract. An offeror may team in order to meet 100% of the requirement as long as 51% of the work is performed by the small business prime.
